PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience in testing, validation, and support for banking security systems. Proven expertise in end-to-end testing of enterprise applications across web, mobile, and desktop platforms. Skilled in manual testing, functional testing, regression testing, API testing, database validation, and test automation. Strong background in production support, client demos, and defect management for mission-critical applications.

TECHNICAL SKILLS

Testing: Manual Testing, Functional Testing, Regression Testing, Integration Testing, UAT, Exploratory Testing, Test Case Design, Test Planning

Automation: Selenium WebDriver, Java, TestNG, Maven

Tools: Postman, JMeter, SQL Server, IIS, Wireshark, Eclipse

WORK EXPERIENCE

Software Engineer – Testing, Validation & Support | *Rax-Tech International, Chennai* | Dec 2022 – Present

- Promoted from Junior Tester to Software Engineer in 2023 for consistent quality delivery
- Complete project ownership for EVA (Edge Video Analytics) platform across 15+ production releases
- Identified 50+ critical defects per release through comprehensive manual testing
- Execute end-to-end testing for AI-based ATM security systems deployed across multiple banking clients
- Perform API testing, database validation, and performance testing for multi-platform applications
- Provide L2 production support and conduct client demos for banking clients, troubleshooting critical issues
- Developed automation framework reducing regression cycle time by 87% using Selenium, Java, and TestNG

KEY PROJECTS

EVA – Edge Video Analytics (ATM Security Platform)

- Complete project ownership for AI-based real-time ATM security system serving multiple banking clients
- Tested mask/helmet detection, loitering alerts, people counting, and object identification features
- Managed testing across 15+ releases (v2.10 to v3.0.3) with evolving requirements

ACS – Access Control System (Bank Locker Security)

- Built automation framework for OTP-based multi-factor authentication system
- Reduced regression testing time from 8 hours to 1 hour (87% efficiency gain)

CMMS – Central Monitoring Management System

- Validated real-time alerts, device monitoring, and notification workflows for banking infrastructure

ERP – Enterprise Resource Planning

- Executed functional and regression testing for accounting, project management, and supply chain modules

EDUCATION

Bachelor of Technology – Electrical & Electronics Engineering Vel Tech University | 2015 – 2021 | CGPA: 7.13/10

CERTIFICATIONS

Software Testing (Manual & Automation) – Besant Technologies | Mar 2021 – Aug 2021
